

Oldcastle Infrastructure™
A CRH COMPANY

Solving today.
Transforming tomorrow.™

Bringing structure to **COMMUNITIES.**

-  Water
-  Communications
-  Transportation
-  Energy
-  Building Structures

Sun up to sun down, in small ways and large, Oldcastle Infrastructure (formerly Oldcastle Precast) is creating the best products we can, on as many levels as we can, for as many people as we can. As a result, the things we produce deliver so much more than structures. They transform communities from the ground up. They become the threads that weave life, business and opportunity together. In newer ways and better ways.

Let's work together today, so we can transform tomorrow.

A young boy and a woman are shown in profile, looking out a window. The boy is on the left, wearing a blue and white striped sweater. The woman is on the right, also wearing a blue and white striped sweater. The background outside the window is a blurred green landscape, suggesting a train or a fast-moving vehicle. The overall mood is contemplative and shared.

WE'RE ALL IN.

For him. And all of us.

Our products affect millions of people's lives every day. We never forget that.

That's why we've grown to be one of the nation's leading providers of engineered building products and construction accessories. Today, backed by CRH, a global leader in building materials, we're positioned in every major North American market to help you meet your most fundamental challenges. Efficiently. Effectively. Ambitiously.

From building our most vital structures to protecting our systems and resources, together Oldcastle Infrastructure and our customers are making a difference—one project at a time. Because of that, we'll never stop strengthening our capabilities and providing the greatest possible level of support. Just like we have for nearly half a century.

For Oldcastle Infrastructure, transformation comes in five critical forms. Individually, they play their unique roles in improving lives. Together, they help make our company a leader in advancing the world around us.

Water

The need to secure drinkable, fishable, swimmable water is urgent and widespread, and there's plenty of progress to be made when it comes to managing our planet's supply. That's why every day, all around the country, Oldcastle Infrastructure is collaborating with engineers, contractors, and project managers to develop efficient, forward-thinking collection, conveyance and treatment systems that meet the unique needs and precise regulations of each project.

Communications

The exchange of data throughout North America is placing massive stresses on our communications infrastructure. Demand is growing by leaps and bounds. Oldcastle Infrastructure is working with engineers, contractors, and suppliers to design and deliver incredibly reliable pathways to keep us all connected. Our engineered solutions are meeting capacity requirements closer to our homes and businesses. They're protecting sensitive, time-critical communications and are on call around the clock, for hundreds of millions of people.

Transportation

There's a critical need to modernize and reinvest in transportation, the backbone of a competitive and productive economy. Through design, manufacturing, and construction, Oldcastle Infrastructure is committed to keeping our vast transportation network moving in the right direction. All of our transportation offerings—from roads and rails to ports and airports—are engineered, built, and installed for the long haul.

Energy

The United States consumes an estimated four trillion kilowatt hours per year in energy. Oldcastle Infrastructure is there with products engineered to deliver and protect an extensive range of energy technologies—from fossil fuels to nuclear energy and renewable sources. With a deep understanding of how our societies are powered and an excitement for the growing range of sustainable options, we're fully prepared to meet virtually any energy demand.

Building Structures

With the combined demands of population growth and onsite labor reduction, our nation's need for prefabricated building solutions and smart, efficient construction practices is here to stay. Oldcastle Infrastructure understands that every building project involves many different stakeholders and partners, which is why we work so diligently to provide sustainability and long-term value in every building material we deliver.

Better business.
Bolder relationships.
**BRIGHTER
FUTURES.**

Working with us creates
all kinds of opportunity.

Building strong infrastructures is what we do. But it's how we do it that matters most. It takes unshakable commitment. It takes solutions that thoughtfully utilize and preserve our planet's resources. It takes an ability to adapt responses to any need and scale. And it takes doing all of those things—all the time.

PARTNERSHIP

isn't just a word. It's a gamechanger.

WITH A NATIONWIDE NETWORK of nearly 80 manufacturing facilities, more than 4,000 employees, and 2,000 distributors, no matter where you are or what your needs may be, we're here. Ready to roll. More able than anyone. One hundred percent committed.

Our employees have deep experience in every step of the process, from planning and design to delivery

and application. They share the same commitment to customer service and a belief that every interaction is more than a transaction, it's an opportunity to build something special for all those involved.

For us, strong relationships start from day one and never stop building.

RESOURCES & REACH

like no other.

WE ARE NORTH AMERICA'S LARGEST manufacturer of utility products and construction accessories for the telecommunications, energy, and water infrastructure markets. We offer the flexibility of scale, engineering expertise, and product portfolio that no one else can. All without losing the local responsiveness and delivery options you need and deserve.

If that weren't enough, you'll benefit from the strength and global support of CRH, our parent company and a worldwide leader in diversified building products.

With all of this on our side, it's no surprise that we're able to offer the most comprehensive service solutions for Engineers, Contractors, Distributors, Utility Companies, Government Agencies, and more.

SUSTAINABILITY

makes us stronger

WE'RE ALL IN THIS TOGETHER. We all need to do our part to help the planet. But that's just one part of sustainability. There's financial sustainability, too. We believe you shouldn't have to sacrifice one for the other.

Along with CRH, we've adopted a sustainability strategy, in line with the UN Sustainable Development Goals (SDG), to help advance people, planet, and prosperity.

Financial and environmental sustainability aren't mutually exclusive. They're mutually impactful to the greater good and a greater bottom line.

We've identified the following SDG Goals as those that align most with our business:

INDUSTRY, INNOVATION AND INFRASTRUCTURE
(SDG 9)

The Innovation Center provides expertise and leadership to identify and analyze global, market and construction trends and new growth opportunities and maximize the value of sustainable innovation.

SUSTAINABLE CITIES AND COMMUNITIES
(SDG 11)

With our global footprint, we have an opportunity—and a responsibility—to provide building solutions that will create the sustainable communities of the future.

RESPONSIBLE CONSUMPTION AND PRODUCTION
(SDG 12)

This approach evaluates how products and activities impact the environment but it not only evaluates them at one single step, but takes a holistic picture of an entire system.

CLIMATE ACTION
(SDG 13)

We are committed to the highest standards of environmental management in all of our activities and to proactively addressing the challenges and opportunities of climate change.

BUILT for life.
